& Associates, Inc.

*Cosmetic Dental Designs*

October is Breast Cancer Awareness Month

**Imagine going to your dentist**, chewing some gum and having a simple saliva test that can **detect cancer** of the mouth, throat and even breast at its earliest stages!!

This test, currently in research, is showing to be **90%** accurate in detecting oral cancer! Since a patient visits the dentist more frequently than their physician (and dentists are spit experts!), it makes sense for dentists to have this diagnostic tool in the future.

The technique has not yet been approved by the FDA. When approved, it would be a first line of defense in detecting cancers early when they are treatable and can save many lives. Our office looks forward to providing this service *when it becomes available*.

### In honor of **Breast Cancer Awareness Month:**

**Patient Monthly Basket** Reply to this email or sign up at the office for a Basket full of "Cook for the Cure" Kitchen Aide cooking accessories, "Just Jewelry" Pink Bracelet and healthy antioxidant teas, and many lovely pink surprises.

**Exercise Class** Join our popular Health and Image Class for a stimulating **exercise** class called **The LeBed Method, Focus on Healing**. This combination of slow, smooth and resistance movements helps not only breast cancer patients but also anyone with limited movement or pain (and that includes all of us!)

Wednesday, October 10, 2007  
7:00pm

**To make you smile!** Too much of a good thing, can be wonderful! Mae West
